BLA-GS INVITES RONAN BOUTOT

British Livebearer Association Guppy Section, Has received news of Ronan Boutot's acceptance to speak at the Guppy Seminar in February 2010

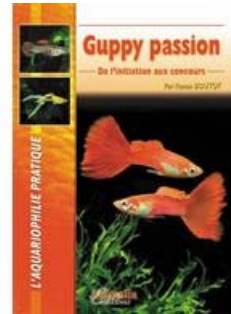

Ronan is the French author of Guppy Passion - From introduction to competition

The guppy is generally regarded as a fish "easy", reserved for beginners. It is indeed true that its requirements are easily met and when it does, its maintenance and reproduction present no difficulty. However, the amateur who

looks more closely at this charming small viviparous quickly perceives that there are multiple forms of tail shapes and innumerable body pattern and colours. He wants to get these fish, rearing, reproduction and improved. Gradually he will be attacked by the passion of the guppy and join the ranks of breeders who have attended exhibitions in which they compete at National and International Championship levels.

Until now no book been available to the hobbyist to take the step towards the guppy competition. That is the purpose of this guide it is aimed at both beginners and hobbyists. It provides the reader with all the necessary maintenance and reproduction of the guppy and initiates standards, genetics and plant breeding.
